

Who says lightning won't strike the same place twice!

As the matter of fact it did...

900 Global has proved it.

The Break Pearl™ is the counterpart to the backending, honor score producing, head turning, scoring machine, original Break™. The Break Pearl is clean through the heads and more angular (if that's possible) off the break point. The Pearlized S70™ cover stores more energy for more angle of entry at the pins.

Greater angle of entry means more strikes.
