

RC900

Welcome to the Next Generation of Bowling

Instructions:

- The "RC-900" can be rolled by hand or ramp.
- Face the arrows on the ball the same direction as the arrows on the lane.
- Using the remote the bowler may steer the ball either left or right.
- * Important note - the remote should not be operated after the ball enters the ball return area to prevent it from jumping the track in the underground ball return area.
